ELASTIC TRAMPOLINES

**SAFE AND DURABLE TRAMPOLINES
FOR YOUR BUSINESS**

CATALOGUE

Elastic trampolines for entertainment

Introduction

Our mission, our values, our view

Welcome at Guzzi Eugenio's, since 1987 the **Italian manufacturer of professional trampolines leader in the market** of outdoor installations.

With an experience of over 30 years in the marketplace, **we've helped dozens of entrepreneurs** with their amusement parks, restaurants, campings, FECs, theme parks, adventure parks, resorts, water parks, and many more entrepreneurship activities.

What Guzzi Eugenio provide so valuable to its customer? If you want to start (or grow) your business in the leisure and entertainment sector, you must rely on tough and resistant products, that requires very little maintenance, but at the same time that have high performance in order to attract audience for the prosperity of your business. No one entrusts their health to a poor doctor, we all want the best for ourselves. Therefore, even in business, **you must rely on the best and most competent supplier.**

This is exactly what we do at Guzzi Eugenio's. We develop trampolines able to:

- brilliantly withstand every outdoor weather condition (from the arctic snow to the desert sun);
- bear every load and frequency of load (more than half a ton per single jumping mat, more than 10 million cycles a year);
- withstand wear and consumption over time (requiring no, or very little, maintenance to operators);
- **amaze the expectations of users** that can simply jump for fun, or improve their skills to stay fit, or even train for sports competitions.

Premise

First of all, our trampolines are highly professional, resistant and long-lasting products, **designed for intensive use** or in any case suitable for people who use the structure **for commercial and business purposes**. Therefore, since our typical customers expect our products to last at least ten years in conditions of high stress (difficult climates and / or very high influx of people), we design and build our structures with characteristics of resistance such that the prices are absolutely not comparable to those of trampolines intended for private use only (eg round trampolines for sale in the main shopping centers or on the various e-commerce platforms).

In conclusion, we don't care about price of the equipment as we focus on quality and performance overall, certain that these two characteristics together will make our client's business prosperous in the long run.

For large parks

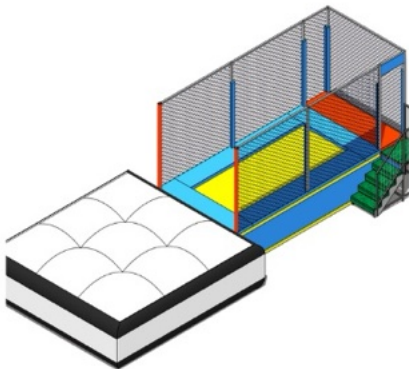

Trampoline Airbag Station

Please feel free to fly

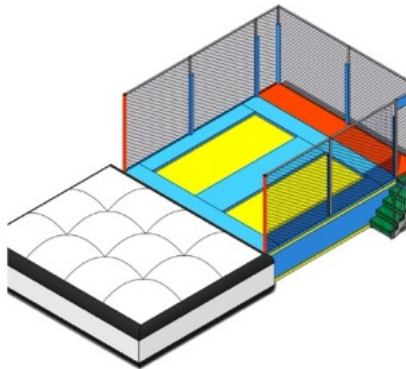

renting - festivals - public events

**ART. TAS.1 - single
trampoline with airbag**

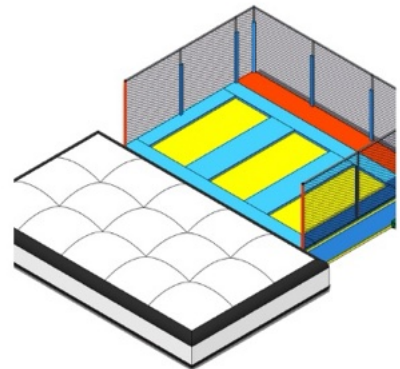

Dimensions: footprint 11.70 x 6.00 m (height 3.52 m).

**ART. TAS.2 - double
trampoline with airbag**

Dimensions: footprint 11.70 x 7.40 m (height 3.52 m).

**ART. TAS.3 - triple
trampoline with airbag**

Dimensions: footprint 11.70 x 10.10 m (height 3.52 m).

Why equipping a trampoline with an Airbag works so good? Because **the business model is winning**. Whether you choose a very low ticket for a single ride or a high ticket for a long ride, the real value stays inside the **large audience you can host in a certain amount of time**. Another plus is that your audience will enjoy a **really short queue time** and in the meantime there will always be the entertainment to **see what other jumpers are doing**. It's a win-win situation, for managers and clients.

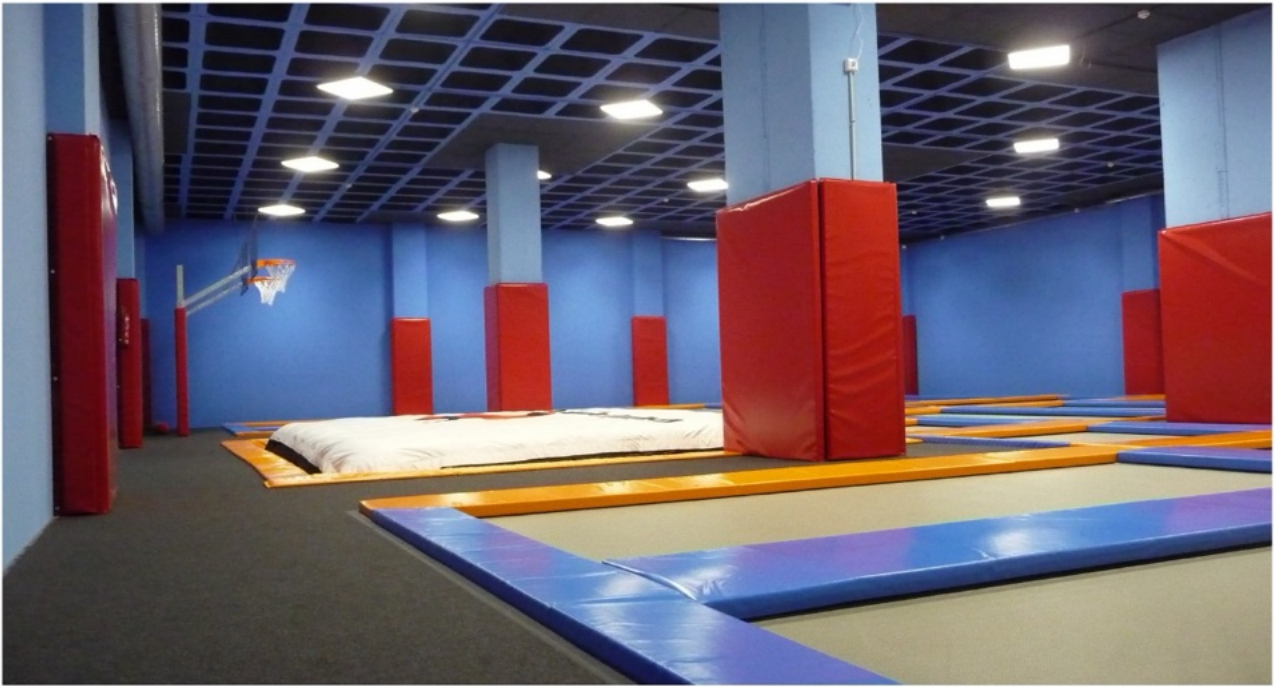

Trampoline Parks

Flexibility and profitability

indoor facilities - gym classes - fitness

- Re-usable materials and components
- Spare parts always available so as not to force you to close the facility
- Safe and durable equipments, designed and installed by professionals
- Rare-maintenance-need trampoline so as not to overwhelm your staff and finances

Our strong and **flexible design** allow us to easily fill in spaces in order to create stunning trampoline parks with simplicity. Several elements available, **low investment costs**, high safety level, and, overall, simplicity and clean design. Keep everything nice and simple is the key. We transform even small areas into play paradises.

Only **one interlocutor for your project**. We think and make everything at home. From inspection to measurements of the site, from design to manufacturing up to transport and installation. One company for your **turnkey project**.

Mini Trampoline Park

Portability and appeal

renting - festivals - fitness - schools

- Standalone equipment - fence included
- Easy assembly - 2 people 4 hrs all in
- Modern look - designed to be attractive
- Thin safety pads - new quality rigid foam
- Foam obstacles - challenging and fun
- New soft touch jumping mats - don't scratch

A completely **new rigid foam** has allowed us to transform the design of our trampolines. **Elegant narrow & thin safety pads** has now replaced the though ones we normally used, so that it's extremely easy to climb over. The look transformation has been completed by adding a soft touch jumping mat, we'd like to call "**soften bounce**" **jumping mat**. It's the perfect surface for kids because it doesn't scratch and for those building with a low ceiling, as it prevent to jump higher than a certain amount. Great news! We can also **equip existing structures** with these new components, to give them a new look and a new life of use.

Our components

Because we do it better

Hot-dip galvanized frame

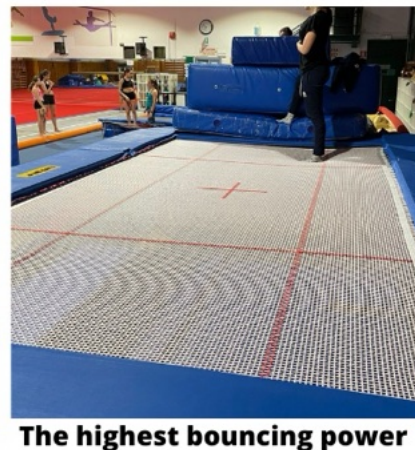

Smart hooking system

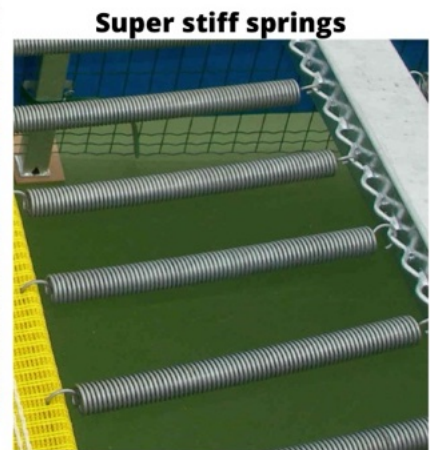

Anti-tear safety pads

Soft anti-scratch fence

The highest bouncing power

Super stiff springs

What most distinguish us from the other players in the market? Is the same reason why we're chosen by our clients, who are the market leaders in their respective sectors.

- 20 years duration of the metal frame
- every jumping mat tested with >1/2 ton
- 1 maintenance service every 3-5 years
- high bouncing power to attract audience
- spare parts always available (all sizes)
- certification from TÜV Rheinland since 2004
- reliable partners & handcrafted products

Spare parts

Even unconventional sizes

SAFETY PADS WITH FOAM
